Education

Karunya University

Bachelor's of Electronics and Communication Engineering

Jun 2021 – Jun 2025

Coimbatore, Tamil Nadu

Technical Skills

Languages: Java, HTML/CSS, JavaScript, SQL, Assembly Language

Programming Concepts: Object-Oriented Programming (OOP), API

Technologies/Frameworks: React, Figma, Tailwind CSS, GitHub, MongoDB, Node.js, Express.js

Developer Tools: Postman, Git, VS Code, Eclipse, IntelliJ IDEA

Projects

Product Catalog | React Js, Tailwind CSS, Figma, Git and GitHub

November 2024

- Developed a responsive product showcase website using React.js and Tailwind CSS, ensuring optimal visibility and accessibility for client products across desktop and mobile platforms.
- Enhanced user engagement by designing an intuitive, dynamic interface with SVG assets, providing a seamless browsing experience for customers.
- Deployed the website using Git and GitHub, ensuring smooth version control, expanding the client's reach and business opportunities.

Automated Restaurant Ordering System | Java, MySQL, JDBC, Git and GitHub

August 2024

- Implemented table availability, order placement, and bill generation features using Java, MySQL, and JDBC, reducing manual errors by 50%.
- Designed a relational database for managing menu, orders, and table data, optimizing performance and ensuring data integrity.
- Built a modular system using Java, MySQL, and JDBC, following object-oriented programming principles, with version control managed through Git and GitHub for collaborative development.

HealthAasaan Platform | Figma, Photoshop

November 2023

- Designed the prototype for HealthAasaan, a healthcare platform with features for appointment cancellations, rescheduling, and live consultations via video, audio, and chat.
- Created user-centric design elements for real-time doctor availability tracking, notifications, and alternative solutions for missed sessions.
- Developed the prototype to enhance community engagement with traditional remedy sharing, intuitive search tools, and multimedia content.

Experience

VoltofCodes

Jan 2024 – February 2024

Web Development Intern

Delhi, India (Remote)

- Built a dynamic task management app with React hooks for efficient state management and local storage integration.
- Styled the application with Tailwind CSS to create a modern, responsive UI for optimal user experience.
- Ensured cross-browser compatibility and tested for seamless performance across devices.
- Uploaded the project to GitHub, demonstrating proficiency in React.js, front-end development, and version control.

CodeSpeedy Technology Private Limited

Jun 2023– July 2023

Java Software Developer Intern

Kolkata, India (Remote)

- Developed applications for data validation, hotel room booking, and secure ATM management using Java and JDBC.
- Gained hands-on experience with MySQL, regex, and exception handling.
- Demonstrated proficiency in Java programming and database integration through project documentation on GitHub.

Certifications

- Introduction to Front-End Development Jun 2023
- Version Control May 2023
- Full Stack Development January 2023
- Programming In Java October 2022
